## Presentation

### LET ME ENTERTAIN YOU!

#### *The Key to Delivering Effective Safety*

#### *Presentations*

***The safety profession deals with a very important topic, which is, primarily, about saving lives. Safety presentations have gained a poor reputation because of the way they have been presented and the lack of entertainment value.***

Anyone who sets out to present, persuade, and propel with the spoken word faces many pitfalls.

This presentation is based upon more than 27 years experience in professional speaking and learning. It is also based upon research we have conducted from around the world from many different resources and we have compressed this research into a short and dynamic program.

There are few things more rewarding than conducting an enjoyable presentation on a safety subject that inspires people to take action.

In this ***highly entertaining*** presentation the audience will discover and learn a selection of the best presentation techniques for anyone who wants to speak professionally, escape their fear, and speak with confidence.

Techniques will be introduced that will push ANY presenter, speaker, or trainer to the next level whether they are a total novice or a seasoned pro and are presented in an interactive manner.

Anyone who wants to speak their best can use these techniques to impact and influence audiences whether they are presenting to a small group or at a large convention.

When these techniques are used and applied, the presenter is free to focus on the safety message and the audience, making the presenter a more dynamic, powerful, persuasive and entertaining communicator.
