

The Safety Solutions Group

Presents a 1 Day Workshop

LET ME ENTERTAIN YOU! The Key to Designing & Delivering Effective Safety Presentations

The safety profession deals with a very important topic, which is, primarily, about saving lives.

Safety presentations have gained a poor reputation because of the way they have been presented & the lack of entertainment value.

Anyone who sets out to present, persuade, and propel with the spoken word would benefit from this workshop.

You will take away:

- A full day of entertaining information that you can use back at your workplace.
- The Participants work-book complete with Exercises/Checklists/Forms and a range of “Actions” to take back with you.
- CD with the facilitators notes, handouts & the PowerPoint presentation so that you can deliver some or all of this Workshop within your workplace.

This workshop can be customised to meet the specific needs of your organization and can be conducted on your site or at a venue of your choice.

The Key to Designing & Delivering Effective Safety Presentations

Workshop Description

Benefits

Anyone who sets out to present, persuade, and propel with the spoken word faces many pitfalls. The bottom line is that busy people have no time to waste. A disorganised and rambling presentation will make them feel cheated and angry.

If presenters are guilty of being a little disorganised – it is crucial they attend and follow this workshop – because they will discover the key elements that are needed to consider when developing and creating an effective safety presentation.

This workshop is based upon more than 27 years experience speaking and learning. It is also based upon research we have conducted from around the world from so many different resources and we have compressed this research into this two day dynamic program.

There are few things more rewarding than conducting an enjoyable presentation on a subject that inspires people to improve.

Outcomes

In this entertaining and educational presentation the audience will discover and learn:

- More about the special needs of their audiences
- A new and different system of presentation design which has been refined over many years which delivers the balance between method and content.
- Methods of evaluating your presentation design
- A range of presentation techniques and applications

The model is simple, easy to follow and will give presenters a way of designing presentations that make them focus on how to present the content and to think about ways of entertaining their audiences as well as instructing them.

In this **highly entertaining** presentation the audience will discover and learn a selection of the best presentation techniques for anyone who wants to speak professionally, escape their fear, and speak with confidence. Techniques that will push ANY presenter, speaker, or trainer to the next level whether they are a total novice or a seasoned pro are presented in an interactive manner.

When these techniques are used and applied, the presenter is free to focus on the message and the audience, making the presenter a more dynamic, powerful, and persuasive and entertaining communicator.
